IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Shunpei Yamazaki et al. Art Unit : 2822
Serial No. : 10/730,047 Examiner : Roy Karl Potter
Filed : December 9, 2003
Title : SEMICONDUCTOR CHIP AND METHOD FOR MANUFACTURING THE
SAME

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

REPLY TO ACTION OF JULY 13, 2005

Claims 1-26 are pending in the application with claims 1, 8, 15 and 23 being independent.

Initially, applicant acknowledges with appreciation the Examiner's allowance of claims 8-22, and the Examiner's indication that claims 2-5 and 7 are directed to allowable subject matter.

Claims 1 and 6 have been rejected as being anticipated by Bellaar (U.S. Patent No. 5,861,666). Applicant requests reconsideration and withdrawal of this rejection because Bellaar does not describe or suggest first and second device formative layers having thicknesses of at most 50 μm . Applicant recognizes that, as set forth in the rejection, Bellaar, at col. 5, line 27-43, notes that an assembly of four chips is 1.2 mm high. However, applicant notes that 1.2 mm equals 1200 μm and, even assuming for sake of argument that the layers of Bellaar's chips constitute formative layers, the 1200 μm dimension of the assembly would in no way require thicknesses of those layers to be at most 50 μm , as recited in claim 1.

Applicant submits that all claims are in condition for allowance.
